Worth a Look

by Karla Kane / Palo Alto Weekly

'Caeneus & Poseidon'

Dragon Productions presents the world premiere of "Caeneus & Poseidon," Bridgette Dutta Portman's play in verse about a transgender hero based in ancient Greek mythology, March 10 through April 2. The play, originally written for the San Francisco Olympians Festival, tells the tale of Caeneus, born with a female body but granted a new, male form by the sea god Poseidon. When the wrathful god turns against him and his relationship with his beloved is threatened, Caeneus must confront the secrets of his past and embrace his unique identity. The play runs Thursdays-Saturdays at 8 p.m. and Sundays at 2 p.m. Tickets are \$27-\$35. On Saturday, March 11, there will be a pre-show talk about the mythology behind the play. Participants are invited to dress in costume as a mythological character for a chance to win a prize, and sample Greek appetizers. Go to [Dragon Productions](#).

'Is Anyone Out There Among the Stars?'

As part of the Silicon Valley Astronomy Lecture Series, Dr. Dan Werthimer of the University of California at Berkeley will give a free, non-technical talk on the possibility of detecting signs of other intelligent life forms in the universe, especially through new technology for detecting radio, light and infrared signals, on Wednesday, March 15, at 7:30 p.m. at Smithwick Theater, Foothill College, 12345 El Monte Road, Los Altos Hills. Werthimer is the chief scientist at the Berkeley SETI Research Center, overseeing the SETI@home project, which analyzes data from the world's largest radio telescope using computers and cellphones from volunteers.
